

COUNTERSMART

CUSTOM COUNTER SOLUTIONS

Custom Designed for your unique needs

Each CounterSMART solution is custom designed and custom manufactured to accommodate the shape, finishes and features that fit your image and technical requirements. Because this solution is completely custom manufactured, we can apply our solution to your existing design, thereby providing the best in both custom design and modular approach.

Designed to withstand the intense use of airport environments, the rugged steel frame structure provides unparalleled strength and durability, and lets you expand, relocate or completely makeover your facilities without having incurring downtime.

Inside the frame structure you'll find ample storage space for your computers and cables, while front-panel access makes it easier than ever to effectively maintain your IT infrastructure. This truly is the most flexible counter solution in the market with high-end custom looks and modular flexibility all rolled into one.

Evans customers include:

Every Counter is a Custom Job

You dream it, we'll build it. You know your processes, your standards, and your image. We know how to build counters that will not only meet your requirements but exceed your expectations.

Flexible and Durable

CounterSMART™ is designed with a modular steel frame offering unmatched durability. The underlying structure can be reconfigured post-installation, which allows the counters to grow with your facility over the years.

Aesthetic Cladding Flexibility

Completely custom designed to meet your needs; your counters will be designed to match your existing image. With the ability to implement laminates, stainless steel, solid surfaces, and more - there truly is no limit to the aesthetic customization of your counters.

Future Considerations

The unique frame structure allows for cost-effective future re-branding overhauls, which can be achieved overnight by simply reconfiguring and recladding existing counters. Similarly, the removable aesthetic panels ensure the counters can be maintained easily.

ADA Compliant and More Options...

Height adjustable counters for easy wheelchair access, third party equipment integration, custom airline-specific features, and more. A true custom solution.

HIGHLIGHTS OF COUNTERSMART

- 1 Structural Steel Frame:** Our steel modular frame offers unmatched lifetime durability.
- 2 PC Storage:** A cavity at the back of the console provides space for PC storage. Hinged doors or sliding compartments provide easy access and more knee space.
- 3 Rear Access Panels:** If desired, rear access panels can provide easy access to cable management and PC inputs.
- 4 Cable Management:** Accessible hidden cable management ensures safety, easy maintenance and limited clutter.
- 5 Custom Equipment:** Any type of custom equipment, such as ticketing printers, kiosks and airline specific peripherals are integrated into the design.
