

INDUSTRY FOCUS

OIL & GAS

The world of oil and gas is a fast paced and high pressure environment — both in and out of the refinery and plant. Every facility requires exacting specifications to facilitate the necessary workflow and technology.

Control room designs need to adapt to the needs of individual processes.

Along with great console solutions, Evans offers other products and services designed specifically for the Oil & Gas, and Refinery environments. Features such as ESD Buttons & Annunciator Panels can be incorporated.

Ensuring your new control room is functional and safe is our top priority.

With over 10,000 worldwide installations, the Evans team understands the control room environment. From complete control room, kitchen remodels and operator ergonomics to live cutovers and installer safety certificates. If it happens in a control room, Evans is the company with the experience to manage your next project.

TURN KEY SOLUTIONS

OPERATOR ERGONOMICS

TURN KEY SOLUTIONS

Put our experience to work for you.

Our teams have worked with many clients in the Oil & Gas sector, including: Shell, Exxon Mobil, Suncor, BP and more.

Evans understands the unique requirements of 24/7 control rooms and critical environments. Our Turn Key Solutions were designed to allow clients to fully leverage our experience in managing the complete project.

Our focus on mission critical environments is your strategic advantage. The Evans certified cross-trained field technicians have multiple skill sets allowing them to complete remodels quickly during plant "turnarounds" and live operations. Allowing Evans to fully manage the process with our turnkey approach benefits your project from start to finish.

LIVE CUTOVER

Many clients do not have the opportunity to shut down the plant while upgrades and new installations are being performed. Over the years, Evans has performed hundreds of "Live Cutover" installations. Starting with a detailed installation and construction plan, the Evans team will orchestrate a seamless installation with zero downtime.

- Adjacent Room Re-Modeling
- Lighting Design
- Acoustical Treatments
- Custom Millwork
- 24/7 Seating
- Raised Access Flooring
- Floor Covering

OPERATOR ERGONOMICS

Control rooms present unique challenges to the ergonomics of a workstation. When it comes to health and productivity of the operators, proper ergonomics play a critical role. Evans adheres to the standards defined by the Human Factors and Ergonomics Society (HFES) and the American National Standards Institute (ANSI).

SAFETY TRAINING

Evans understands the safety concerns our clients have when working with outside companies. To minimize the risk, each field technician and installer have taken safety certification courses including: BOSIET, HUET, Basic Plus and Site Specific training classes. Each installer also carries a valid TWIC card.
