

IDENTITY

OUR PREMIUM PARAMETRIC CONSOLE SOLUTION

The Ultimate in Customizable Console Solutions

Limited only by your imagination, Evans' Identity™ is our most flexible design and sets the industry standard for performance and appearance. Extremely customizable, the Identity™ console displays a virtually unlimited series of options from fully enclosed to fully open, flat panel depth to full CRT depth, a complete array of finishes and work surface materials, adjustable work surfaces to static surfaces and all options in between.

THE EVANS ADVANTAGE

Over **30 years** of manufacturing experience

Equalling over **9000 successful** installations worldwide

Rich and Diverse **Fortune 500** client list

Government Agencies, Oil & Gas, Airports, Air Traffic Control, Chemical Plants, Military **and More**

An **ISO 9001** Certified Manufacturer

Evans's Quality Assurance ensures that all clients consistently receive control center solutions that **precisely match** their intended application

Greenguard Certified Products

Products designed for use in office environments and other indoor spaces meet strict emissions limits, which contribute to the **creation of healthier interiors.**

Steel frame structure and sub structure

Free standing without the need of panels, robust and built to last the abuse of **24/7 intensive** use environments.

IMAGINATION IS THE ONLY LIMIT

Designed to push the bounds of tailored solutions, Identity's parametric frame can be customized to any layout configuration. From a technical perspective, almost any requirement can be matched. Thanks to the strength and durability of its robust frame, it is the only console to be seismically rated. Reach distances, viewing angles, equipment and workflow needs have all been carefully considered. With its huge variety of options the Identity is ideal for any application. In open or closed configurations, fixed or Sit-Stand, The Identity™ is the preferred choice for premium consoles around the world

Portal Framework: The open space between the upper and lower portions of the console permits equipment to float into either plane supporting larger processors and auxiliary equipment.

Extruded Aluminum Upper Beam:

Supports the linear task light and allows large screens to be mounted above the beam.

Optional Equipment Fronts:

Mount and protect critical equipment

Extruded Aluminum and Steel frame:

Lightweight but extremely strong and durable

Front And Rear Access Panels:

Easily access equipment and wire management

Cable Management:

Multiple internal raceways offer hidden cable management

CPU Storage:

Sliding, door mounted CPU shelves and rack mounted server units available

Ergonomics in mind:

Specially designed soft waterfall nosing

GREENGUARD, the most familiar product certification and a globally recognized leader in indoor air quality, has been certifying products since 2001. GREENGUARD is an independent third party certification program that certifies products for low non-toxic emissions. Our furniture is manufactured using recycled and low emitting materials that help our customers meet and exceed environmental standards in their projects. Evans products can be constructed in such a way that they support the LEED Certification of your facility.
