

# LEED Certification Information

Evans has a strong commitment to environmental stewardship. Our products are manufactured using recycled and low emitting materials that help our customers meet and exceed environmental standards in their projects. Accordingly, Evans plays a role in enabling a building project to acquire points towards Leadership in Energy and Environmental Design (LEED) certification.

The LEED Green Building Rating System®, developed by the U.S. Green Building Council under contract with the U.S. Department of Energy, is a voluntary standard for developing environmentally responsible, low emission, high-performance, sustainable buildings. LEED certification is for the entire construction project; materials and products used in buildings are not individually certified. Through a rigorous process of third-party verification by the Green Building Certification Institute (GBCI) the project earns “points” toward achieving a level of certification (Certified, Silver, Gold or Platinum). The use of Evans products contributes to the accumulation of LEED points in selected credit categories of Materials and Resources, Indoor Environmental Quality and Innovation and Design Process as follows:

**TOTAL POTENTIAL CREDITS: 17**

## Materials and Resources: Potential Credits

**MR2.1 CONSTRUCTION WASTE MANAGEMENT DIVERT**  
 – 50% FROM LANDFILL **CREDIT 1**  
 Every Evans console is shipped within “made to order” recyclable wooden crates, ensuring minimal waste. Since utilizing our “crate on demand” system Evans has diverted more than 50% from ending up in landfills.

**MR2.2 CONSTRUCTION WASTE MANAGEMENT DIVERT**  
 – 75% FROM LANDFILL **CREDIT 1**  
 Every Evans console is shipped within “made to order” recyclable wooden crates, ensuring minimal waste. Since utilizing our “crate on demand” system Evans has diverted more than 75% from ending up in landfills.

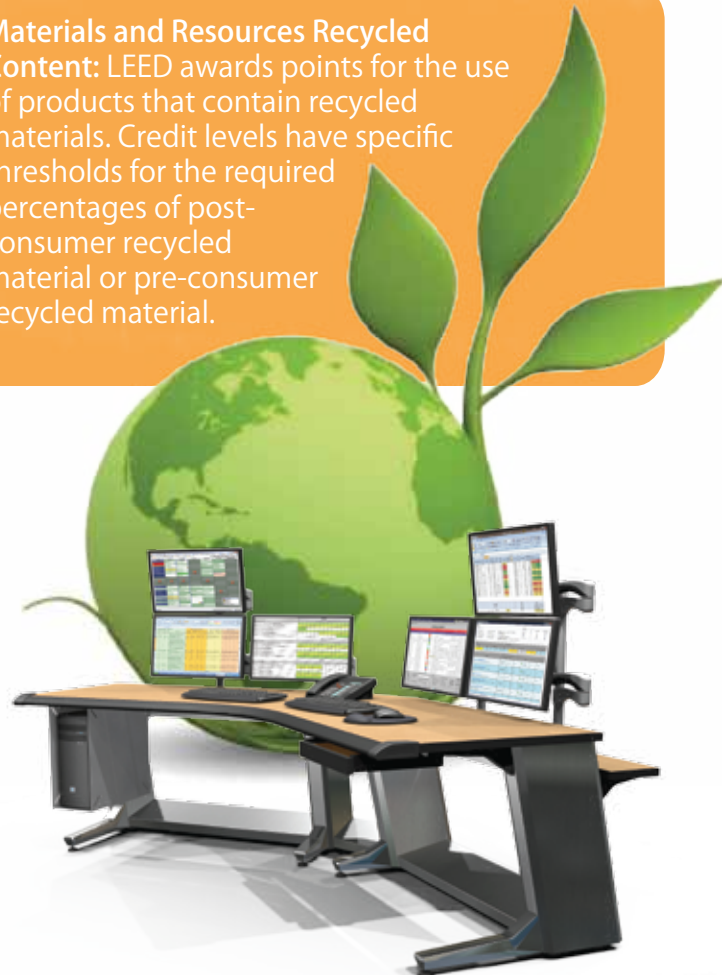

**MR4.1 RECYCLED CONTENT: 10%**  
 – Post Consumer + 1/2 Pre-Consumer **CREDIT 1**  
 Many products within the console lines offer a combined % of recycled content - Typically ^ 40%

**MR4.2 RECYCLED CONTENT: 20%**  
 – Post Consumer + 1/2 Pre-Consumer **CREDIT 1**  
 Many products within the console lines offer a combined % of recycled content - Typically ^ 40%

**MR6.0 RAPIDLY RENEWING MATERIALS**  
 – Harvest cycle less than 10 years **CREDIT 1**  
 Evans customers can specify substrate materials that meet this criteria.

**MR7.0 FSC CERTIFIED WOOD AND LAMINATES**  
 – Achieve 50% FSC Threshold **CREDIT 1**  
 Evans customers can specify FSC certified substrate materials and laminates that meet this criteria

**Materials and Resources Recycled Content:** LEED awards points for the use of products that contain recycled materials. Credit levels have specific thresholds for the required percentages of post-consumer recycled material or pre-consumer recycled material.

## Indoor Environmental Air Quality

**Indoor Environmental Quality** LEED may award a point if all composite wood and agrifiber products installed in the building interior contain no added urea-formaldehyde resins. Additionally, any laminating adhesives used for material installation may not contain added urea-formaldehyde resins.

### EQ4.4 LOW EMITTING MATERIALS

– Composite Wood and Laminate Adhesives **CREDIT 1**

Evans customers can specify wood components that contain no added urea formaldehyde (NUAF) and have been tested and passed BIFMA X7.1 standards

### EQ4.5 LOW EMITTING MATERIALS

– Systems Furniture and Seating **CREDIT 1**

All Evans consoles are GreenGuard Certified and have been tested in accordance with ANSI/BIFMA M7.1-2011 and determined to comply with ANSI/BIFMA X7.1-2011 and ANSI/BIFMA e3-2012 Credit 7.6.1

### EQ6.1 CONTROLLABILITY OF SYSTEMS

– Lighting **CREDIT 1**

Evans customers can specify the EnviroLinc™ system on any console to meet this criteria, or specify individual task lighting equipment

### EQ6.2 CONTROLLABILITY OF SYSTEMS

– Temperature and Ventilation **CREDIT 1**

Evans customers can specify the EnviroLinc™ system on any console to meet this criteria

## EVANS EXPERIENCE

Evans has a 30 year history that is consistent with LEED objectives. These statistics represent the standard Evans console offering. The credit total may vary pending on the product, configuration and included add-on options and components.

## Innovation In Design

### ID1.1 to ID1.4 EXEMPLARY PERFORMANCE

– Recycled Content **UP TO CREDITS 4**

For MR 4.1 and 4.2, many Evans products achieve a recycled content of 45% and higher

### STRATEGIC EXCELLENCE

– Strategies or Measures **UP TO CREDITS 3**

Evans Consoles applies strategies and measures that are not covered by the LEED program but can contribute to additional credits
