**EVANS**

DESIGNS & EQUIPS MISSION CRITICAL OPERATIONS

## ELEGANT SOLUTIONS IN VISUAL ALARMS

LumiLinc™ takes situational awareness to a whole new level by bringing style and sophistication to visual monitoring systems. With LumiLinc, large display panels are unobtrusive during normal operations but provide prominent visual alerts in escalated states. Different colors of LEDs can identify with different situations as defined by your operation. Activate LEDs through our manual switches, use the on-screen digital interface, or integrate LumiLinc with your existing systems.

## Identify. Respond. React.

## Alarms with Impact

LumiLinc is designed to interact with the dynamic environment of the modern control room. Providing bright, striking illuminated displays allows all members of the control room to quickly ascertain the status of their team, or the entire facility.

## Understand and Prioritize Your Control Floor At A Glance

- Customized identifiers for functional units or groups
- Frosted logo and text notification
- Improved situational awareness
- Minimized response times
