

# RESPONSE™

**EVANS**  
DESIGNS & EQUIPS MISSION CRITICAL OPERATIONS

## THE ULTIMATE SOLUTION FOR CONTROL ROOM OPERATIONS

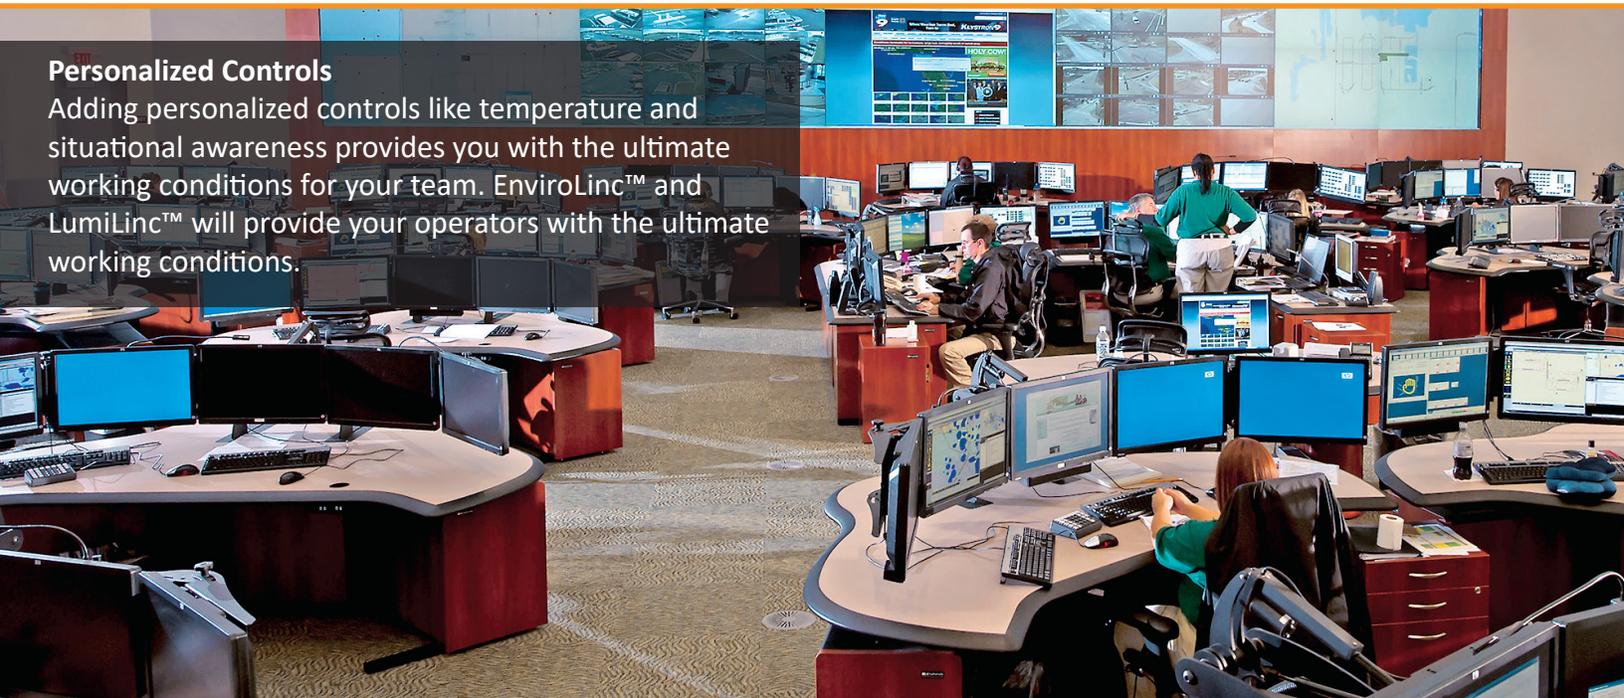

EVANS Response™ addresses ergonomic challenges in the control room by adapting to the individual operator's comfort requirements. From its sit-stand functionality, enhanced monitor mounting options, to EVANS' patented ergonomic nosing and frame design, Response puts operators in control of their individual comfort.

### Robust Solutions for Demanding Environments

With its tough modular frame, Response is designed to withstand the day-to-day demands of your mission-critical environment. Its durable work surface and solid steel frame is designed to accommodate your technology requirements, large screen displays, and more. Response offers enough flexibility into any command and control room environment.

### Personalized Controls

Adding personalized controls like temperature and situational awareness provides you with the ultimate working conditions for your team. EnviroLinc™ and LumiLinc™ will provide your operators with the ultimate working conditions.

# SUPERIOR CABLE MANAGEMENT

Less is more with our patented cable management system, enabling the operator to work in a clutter-free space. Utilizing a wider and deeper technology bridge allows you to run more cables in a completely organized manner, and full front and rear access makes adding or changing cabling quick and easy.

## RESPONSE™

Cables are routed through an E-chain cable management system for clean and efficient routing and bundling.

### RESPONSE™ at a glance

- Ergonomic designs for optimal productivity
- Enhanced cable access and capacity
- Endless configuration options and layout flexibility
