

DISPATCH™ III

EVANS
DESIGNS & EQUIPS MISSION CRITICAL OPERATIONS

THE ULTIMATE 24/7 SIT-STAND DISPATCH SOLUTION

The Dispatch™ III is the ultimate solution for all 24/7 command and control dispatch facilities. With years of industry research, client feedback and design expertise involved in its creation, the Dispatch III console doesn't just meet industry requirements but exceeds them unlike any other product in the marketplace.

EVANS Dispatch III incorporates innovative features designed to enhance any mission-critical environment. Designed with the user experience in mind, Dispatch III showcases what is possible when design and function meet.

Durable, Modular, and Economic

Designed with a rugged steel and aluminum frame – the most structurally sound in the industry – the Dispatch III is durable and flexible. Dispatch III provides the operator with the ultimate in convenience and comfort, with options that include Integrated Personal Storage, EnviroLinc™, and PowerLinc™ systems.

DISPATCH™ III

The 911 Console with Unparalleled Options

The Ultimate in Cable Management

Energy chains throughout the console allow for clean cable flow away from the surface and into the base enclosures, allowing for maximum work surface area. Enclosed PC storage provides a clean look, while front and rear access to these enclosures allow for ease of access with cable changing and IT support. Dispatch III incorporates the optional pop-up and Slatwall power and data access including USB, DVI, Power, HDMI, and Cat6 all prewired for easy connectivity.

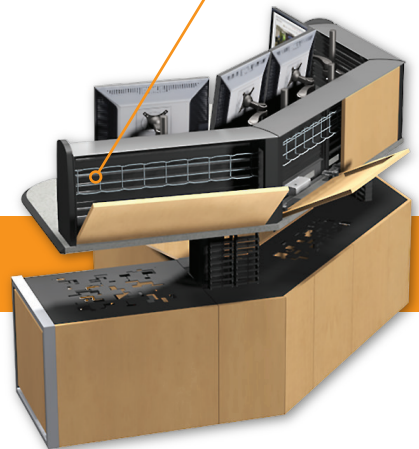

PC Storage:

Store numerous PC's with easy front and rear access. Conveniently stored on a rolling tray for easy maintenance

Cable Management:

Steel cable trays distribute cables throughout the console, keeping them out of sight, safe and easily accessible

Anti-Collision System

Pressure sensitive plates on top of the PC enclosures stop the downward motion of the work surface once an obstruction is detected. ACS was designed to protect the user or equipment that may be in the way.

DISPATCH III at a glance

- Flexible ergonomic design options
- Advanced cable management
- Flexible CPU storage
